

# Incident Response (IR) Planning and Simulation

## WHAT IS INCIDENT RESPONSE PLANNING AND SIMULATION?

*'You need a steady and experienced hand.'*  
Assessment of your IR capabilities,  
procedures, and organization readiness to  
respond to a crisis.

## INCIDENT RESPONSE PLANNING

We assess your current IR procedures and  
organizational posture, and recommend how you  
can better respond to an incident.

## INCIDENT PREPARATION

We leverage the IR assessment and guide your  
organization through table-top exercises.

## INCIDENT SIMULATION

We simulate an incident in real time, and guide  
your IR team how to better detect, mitigate, and  
respond against an attack.

## OUR TACTICS

### Assess

We provide recommendations to improve your  
overall response posture, from procedures,  
policies, chain-of-command execution, and  
priority decision making.

### Table-top exercises

We execute your Incident Response plan with  
your team; guide them through the procedures;  
develop clarity in who does what, when, and  
why.

### 'Live Fire'

We walk through executing your IR plan in a  
controlled sandbox or in a 'live fire' setting to  
test your team and IR plan.

# BENEFITS

## 01. PLAN YOUR RESPONSE & WORK YOUR PLAN

Our approach leaves you with a realistic, comprehensive plan and procedures that your  
team can execute.

## 02. PRACTICE, PRACTICE, PRACTICE

Our assessment and simulation services leave you with an approach and framework to  
practice and gain confidence.

## 03. REALISTIC

We use our experience simulating adversary tactics including corporate account  
takeover, ransomware, malware infections, phishing, and social engineering amongst  
other tactics.

## 04. WHO DOES WHAT?

We help assign roles and responsibilities to deploy a clear chain-of command to respond  
to in a crisis.
